

----- cutting edge

file formats: PDF, EPS, TIF, PSD
colour space: CMYK, greyscale, Pantone
resolution: min. 250 dpi
colour appl.: max. 320%
bleed area: 3 mm circumferential

(Printed matter is always created approximately 3 mm larger than it will later be in the final format to avoid white flashes, i.e. white "crescents" on the outer edge.
Therefore, place the labels with a diameter of 175 mm, although the final format 169 mm. Make sure that in the edge area and at the center hole
(Final size 7.5) e.g. no text can be cut away!)

**Attention: Specification not in original size.
Please use template.**
